Presentation Slides

Slide 1: Title Slide

Project Title

Domain/Theme

Team Members:

[Name 1] ([Roll No.])

[Name 2] ([Roll No.])

[Name 3] ([Roll No.])

Project Guide Name:

Slide 2: Introduction & Problem Statement

Background: Briefly introduce the domain and the context of your project.

Problem Statement: What is the specific real world problem you are trying to solve?

Motivation: Why is this problem important to solve right now? What is the impact of solving it?

Slide 3: Project Objectives

Primary Objective: The main goal of the project (1 sentence).

Specific Goals

To design/develop...

To implement/analyze...

To evaluate/optimize...

Slide 4: Literature Review & Research Gap

Existing Systems: Briefly mention 2-3 existing solutions or related research papers.

Limitations of Existing Systems: What do the current solutions lack?

Research Gap: How does your project address these specific limitations?

Slide 5: Proposed Methodology / System Architecture

Proposed Approach: A high-level explanation of how you plan to solve the problem.

Block Diagram / Flowchart: A visual representation of your system architecture, data flow, or algorithm pipeline.

Slide 6: Tools, Technologies & Resources

Hardware Requirements

Software & Tech Stack

Languages: Python, Java, C++, etc.

Frameworks/Libraries: TensorFlow, PyTorch, React, Django, etc.

Database: MongoDB, MySQL, Firebase, etc.

Datasets: Name and source of the dataset you will

Slide 7: Expected Outcomes & Deliverables

Final Output: What will the final product look like? (e.g., A web-based dashboard, a mobile app, a predictive AI model, a hardware prototype).

Key Deliverables:

Working Prototype / Software Application.

Comprehensive Project Report.

Source Code / GitHub Repository.

Research Paper / Patent

Slide 8: Project Timeline (Milestones)

Week 1-2: Literature survey and Synopsis approval.

Week 3-5: Requirement gathering, dataset collection, and system design.

Week 6-9: Core implementation and coding (Mid-Term Review).

Week 10-12: Testing, debugging, and result analysis.

Week 13-14: Final Report writing, Poster preparation, and Final Viva.

Slide 9: References & Q&A

References: List 3-5 key research papers, articles, or documentation you referred to (Use IEEE or APA format).

Q&A: "Thank you! We are now open to questions and feedback from the committee."
